Introduction

Because we want to explain people how dating platforms work and why they are so successful.

Content

Dating platforms, are websites or apps, where you can find someone you like or find attractive, by turning on a filter to find people with your personal preferences. You can easily create an account and put your information in it, height, eye color, etc. Example: Parship, Loovo and Tinder.

Our website should describe following topics:

- History
    - Why are they so popular?
    - Difference between big dating platforms
- Definition
- Pros and Cons
